3. Farmer's Agriculture income is one lakh per month in 2 ecars.
4. Developing our old best seeds.
5. Increasing the Indian cows breed by maintain the Goshala.

About GLR Natural Agri Farms

GLR Agri farms is the innovative form of production of agricultural products grown in an absolutely natural way.

The production is based on the intelligent agricultural management (guidance by the famous Natural Agriculturalist Sri. Subhash Palekar), which follows the modern methods of Cultivation, focused on the maintenance of natural resources and without the use of fertilizers and strong pesticides.

In Agrifarm, We believe that natural foods should be subject to minimal processing without affecting their taste or reducing their nutritional value. This way the provision of quality products with characteristics and specifications must begin from the cultivation field.

We are following these methods

1. Four Wheel of Zero Budget Spiritual Farming.

1. Bijamrita.
2. Jiwamrita.
3. Mulching.
4. Waaphasa.

2. Insect and Pest Management.

1. Agniastra (Agni Missile)
2. Bramhastra (Bramha Missile)
3. Neemastra (Neem Missile)
