

Nice Foundation

Excellence in Healthcare

Doctors are revered as Demigods as they save lives. However, in the present days the medical services are highly commercialized. The NICE foundation was set up to provide free medical treatment to the poor and subsidized healthcare services to the middle class. Under the arm and with the financial support from Dr Reddy's, Nice Foundation has pioneered Community Health Intervention Program (CHIP) taking healthcare directly to the community by offering free medical services to tribal's, women and children in Telangana and Andhra Pradesh.

The foundation has won the hearts of millions by offering their services across 160 villages in Nalgonda, Vizianagaram, Visakhapatnam districts. They are also offering free medicines to bedridden patients in a few villages. This is not all. NICE is also catering to the medical needs of families of government school children as part of fulfilling their social responsibility.

This has been extended to 256 government schools. To prevent death of infants, NICE hospital which works under the foundation, is working towards ensuring the health of the newborn. Sakshi recognizes NICE Foundation for its contribution towards offering quality medical services at affordable prices and honours it with Sakshi Excellence Award 2017 in the healthcare category.
